DETAILED ACTION

1. The restriction requirement is withdrawn. All claims are examined below.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 7-13 and 16-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,672,330 in view of Matsui et al. (US Patent Number 4,648,308). Claims 1-30 of U.S. Patent No. 6,672,330 disclose all the limitations of claims 7-13 and 16-26 of the present application except for the insert metal layer used with the diffusion bonding. Matsui et al. disclose the use of a metal insert layer in a similar device that is made by diffusion bonding. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used the metal insert layer of Matsui et al. with claims 1-30 of U.S. Patent No. 6,672,330 in order to improve mechanical characteristics, such as bonding strength, fatigue strength, and high temperature strength as taught by Matsui et al. (see column 4, lines 54-61).

Art Unit: 3754

4. Claims 7-13 and 16-26 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14-25 of copending Application No. 10/270,515. Claims 14-25 of copending Application No. 10/270,515 disclose the limitations set forth in claims 7-13 and 16-26 of the present application.

This is a provisional obviousness-type double patenting rejection.
